

EDUCATION

- **Manipal Institute of Technology** Manipal, Karnataka
Bachelor of Technology in Computer Science 2027
Relevant Coursework:
 - **DSA, CN, OS, SDLC, COA & Embedded Systems, Digital Marketing**
 - **Object-Oriented Programming:** OOP concepts, JavaFX, multi-threading, and exception handling.
 - **DBMS:** SQL, ER modeling, normalization, transactions, query practice and database handling.
- **U.S.M. Senior Secondary Public School** Nangloi, Delhi
Senior Secondary (10+2) 2023

TECHNICAL SKILLS

- **Languages:** C/C++, Java, Python, SQL, PL/SQL, HTML, CSS, JavaScript, Embedded C, ARM Assembly
- **Web, Frameworks & Technologies:** Tailwind CSS, Bootstrap, Django, CUDA, MPI, JavaFX
- **Tools & Platforms:** Git, GitHub, Linux (Ubuntu, Debian) , MySQL, Supabase, Vercel, VirtualBox, Cisco Packet Tracer, KEIL uVision, MS Excel

POSITIONS OF RESPONSIBILITY

- **Management Committee Member** at Manipal Information Security Team (MIST), TCCAM (Consultancy Club), and ESOM (Economics and Finance Club)
- Contributed to **Magnify**, TCCAM's consulting event focused on solving real-world business problems using emerging technologies like **AI/ML**, digital transformation tools, and strategic frameworks.

PROJECTS

- **LLM-Based DevSecOps Platform for Proactive Security Analysis** 🌐 2025
LLMs, GitHub Actions, CI/CD, Static Analysis, DevSecOps
 - Built an LLM-based DevSecOps pipeline integrated with GitHub CI/CD for near real-time security analysis (**30s per commit**).
 - Implemented commit-diff vulnerability detection by filtering rule-based static analysis results through an LLM semantic reasoning layer to isolate SQLi and XSS flaws.
 - Automated security reports (JSON & Markdown) with feedback directly on GitHub Pull Requests, reducing manual review effort.
 - Designed a quality gate to block merges for high/critical vulnerabilities and ensure secure deployments.
- **Manipal Airlines — Airline Reservation System** 🌐 2025
Django, Python, JavaScript, Leaflet.js, Chart.js, SQLite
 - Built a full-stack airline reservation system with flight search, real-time seat selection, and end-to-end booking lifecycle management..
 - Engineered geospatial flight route visualization using Leaflet.js and a price trend analysis module with Chart.js, providing 7-day fare predictions and booking recommendations.
 - Designed a custom CSS design system with 50+ tokenized variables delivering a premium editorial UI with responsive layouts, skeleton loaders, and micro-animations.
- **Course Projects**
 - **Network Packet Analyzer (PCAP Project)** 🌐
Developed a packet capture and network traffic analysis tool using C and the PCAP library in Linux.
 - **Smart Healthcare Management System (SHMS)** 🌐
Built a JavaFX-based healthcare management system for handling patients, doctors, and appointments with file-based storage.
- **Capture The Flag (CTF) Writeups TryHackMe — picoCTF** 2024
Cyber Security, Linux, Web Exploitation, Cryptography
 - Authored writeups for 30+ beginner to intermediate CTF challenges on TryHackMe, picoCTF, and OverTheWire.
 - Solved problems involving basic web vulnerabilities, Linux commands, and introductory cryptography concepts.
 - Gained hands-on experience in problem-solving, enumeration, and understanding common security flaws.
 - Documented step-by-step approaches and solutions for learning and reproducibility.

CERTIFICATIONS

- **Coursera:** Digital Marketing – Illinois Urbana
- **Workshop Participation:** Attended PixelVision MIT-GPT Workshop (Techtatva 23)
- **Programming Contest Participation:** CreaTech 2024 (L&T), Adobe India, EY Techathon 6.0
- **Case Study Competition:** NationBuilding Case Study, The Fifth Move 2025, Prod-A-Thon '25
